Drip Tray Options

3 litre overflow kit connects the drip tray to a 3 litre alarmed overflow container. The container has a tap to empty without removing it. Factory fitted or self-installed.

10 litre overflow system with alarm to signal when full. Factory fitted.

Mains drainage system connecting the drip tray to the waste. Factory installed.

A pumped main drainage system pumps the waste water from the drip tray over a distance of 100m and a rise of 5m. Factory installed.

Fixing the cooler to wall and floor

A strong metal cowl to fix the water cooler to the wall and floor. Self-installed (also available for fountains).

Wall bracket to fit all coolers and fountains. Self-installed.

POU Installation rail and filters

Installation rail with filter. Includes compression fitting, 1 Micron Green filter. Water block. Copper pressure reducing valve and non-return valve.

Green filter housing with carbon block filter and nanofilter. Filter housing, 1-Micron Green filter carbon block candle. Nano filter candle, high viral, cyst, pharma performance.

Flood prevention

Flood prevention that works! A flood prevention valve linked to a timer turns the mains water off overnight and at weekends. Comes as part of the installation rail or can be purchased separately.

Conversion kit

Easily convertible from bottled to POU. The bottled top includes Spill Guard leak protection.
